AZ Restaurant Partners

Enterprise technology for small and mid-size restaurants.

One connected system: phone, tables, counter, website, kitchen and owner app. Live in our own restaurant every day.

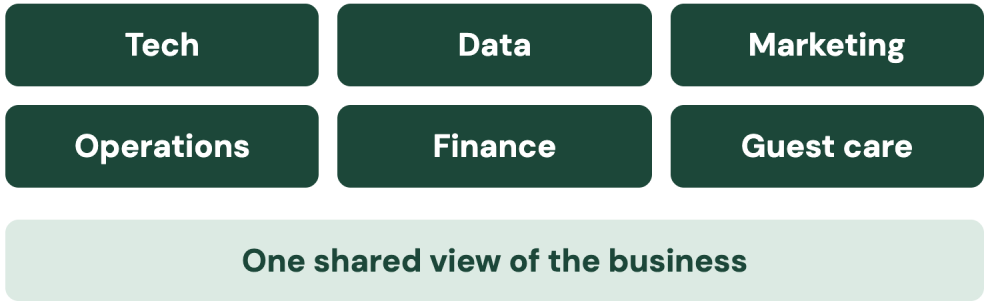

Abbas Zoeb, founder · abbas@azrestaurantpartners.com · azrestaurantpartners.com

THE PROBLEM

Chains have a back office. An independent owner is the back office.

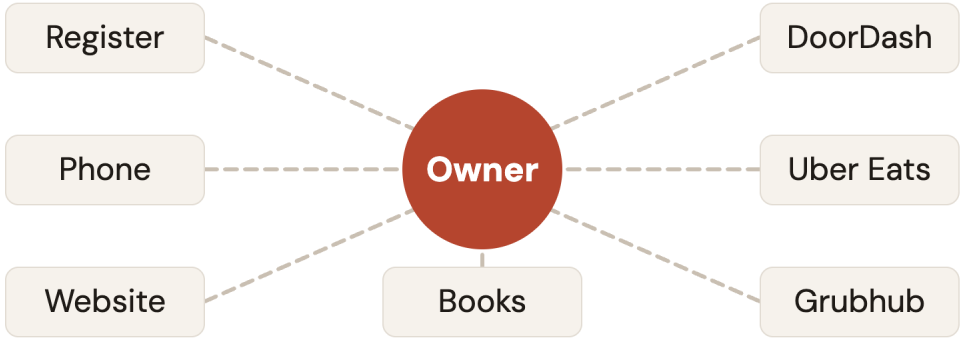

A chain

A team for every department, on shared data

An independent

One person, 7 systems that never talk

US independents fell 2.3% in 2025 to 412,498; the top 500 chains grew 1.5% (Technomic via NRN, Feb 2026). The 7 systems are the ones in our own restaurant.

WHAT WE LEARNED RUNNING OUR OWN RESTAURANT

Chains win because a team runs their tools. Now AI can be that team.

WHAT THE OWNER GETS

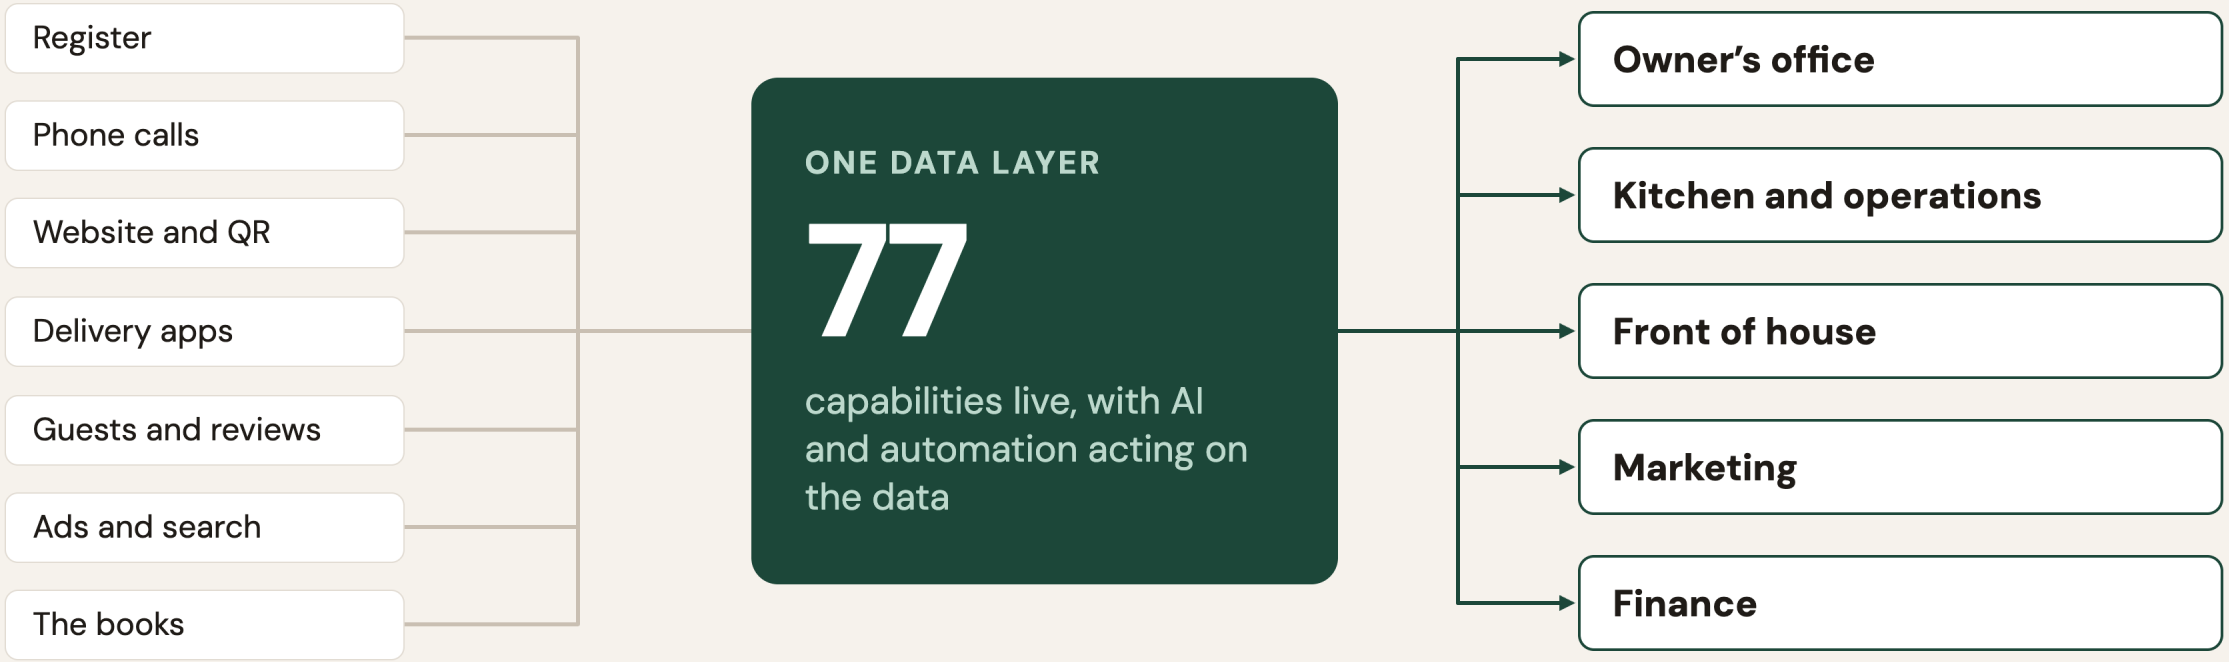

Ask it. Approve it. Done.

A ChatGPT that knows the whole restaurant, and does the work.

WHAT WE DO

One data layer. Every department runs on it.

Next on the same layer: purchasing and inventory, scheduling and payroll.

TRACTION

It runs a real restaurant every day. Built by one founder.

~800
orders a month at our restaurant, every one placed by the guest

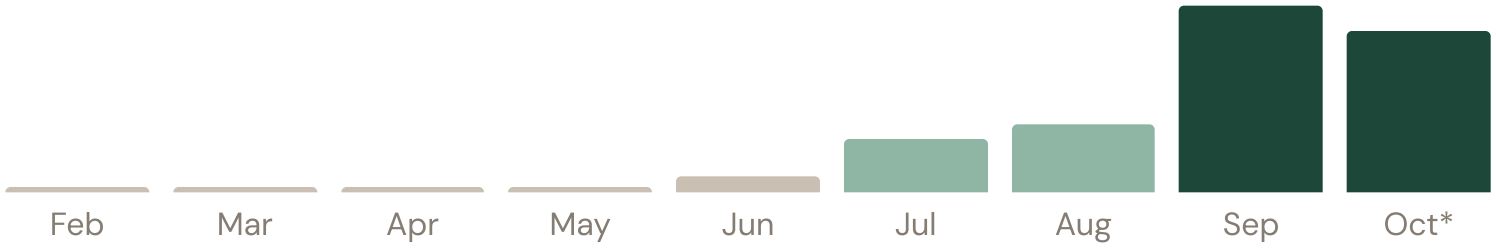

100%
of online orders are direct, up from 17% in August

965
Google reviews at 4.5 stars, up from about 400 in May 2024

2
more Houston restaurants have signed on

77
capabilities live, all built since February 2026 by one founder and AI agents

CHANGES SHIPPED TO PRODUCTION, PER MONTH

Wok & Karahi, Spring TX. Changes: our code history, bots excluded; *Oct to the 21st. Covered by FOX 26 Houston and KPRC 2.

MODEL AND MARKET

Priced services now. One connected system next.

NOW

23 priced services

Live on our site, to learn what owners actually pay for.

NEXT

A standard install

The most-bought services become what every new restaurant gets.

THEN

More departments

Purchasing, inventory and scheduling on the same data.

412k

US independent restaurants

×

~$12k

a year Toast earns per location

=

~$5B

a year, at a price the market already pays

Technomic via NRN, end 2025. Toast Q4 2025: 164k locations, over $2.0B ARR.

WHY NOW, AND WHO ELSE

Everyone else sells one tool. We run the departments.

Who	The gap
Toast	Works only inside Toast
Owner.com, Popmenu	Sells the tools; the owner still runs them
AI phone tools	One channel, no shared data
AZ	Any tool, one data layer, AI runs the work

FOUNDER · ABBAS ZOEB

The engineer and the customer.

Google: solutions engineer on GameSnacks, about 1M to 1B users in about a year

Hard Rock Cafe: led its first AI agents

Wok & Karahi: my restaurant, sales doubled in 18 months

Commitment: I am employed, AZ is what I do, and I resign the day it is funded

Searching: a commercial co-founder who has sold to independent restaurants, and chain veterans as advisors

THE ASK

Raising $1M on a SAFE for 24 months.

Second-restaurant build

Make the system install on other restaurants and other registers.

Sales

A commercial co-founder or first seller, starting with Houston owners.

Install and support

People who set up each restaurant in person and look after it.

Founder full-time

My salary, so I can resign and do only this.

Likely buyers later: POS and restaurant platforms such as Toast and Owner.com.

APPENDIX

The departments, in detail.

Kitchen and operations · Front of house · Marketing and finance

DEPARTMENT: KITCHEN AND OPERATIONS

The line only sees paid, clear tickets. Nobody touches them.

Chef's 10 AM prep text. Expected orders, rush hours, prep list, pickups.

Say it once. A dish goes off on the register, site, QR and phone, and back on time.

One switch. Close or pause every ordering door at once.

Honest pickup times from the live queue across every channel.

EVERY ORDER, AUTOMATICALLY

1. **Order in** by phone, table, web or app
2. **Paid** by Apple Pay, Google Pay or a texted link
3. **Ticket prints itself** with table, name and the guest's notes
4. **Guest gets a text** when it's ready

A ticket fails to print? The owner gets a text.

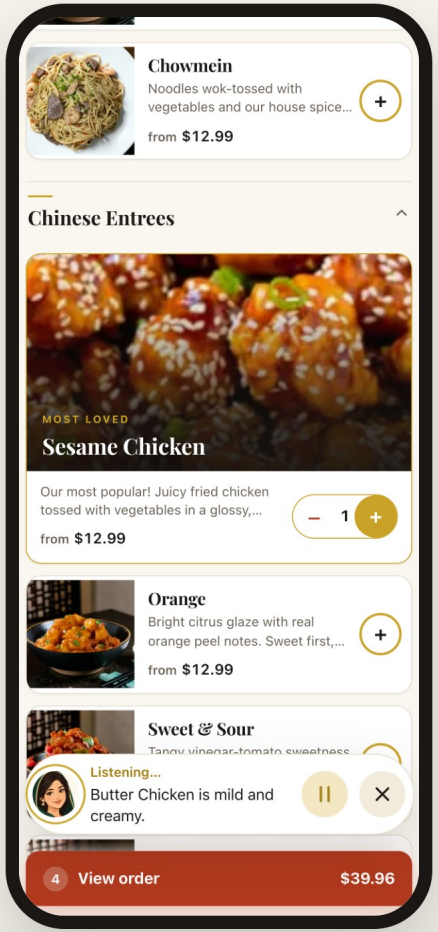

DEPARTMENT: FRONT OF HOUSE

Every door has the same host, in the guest's language.

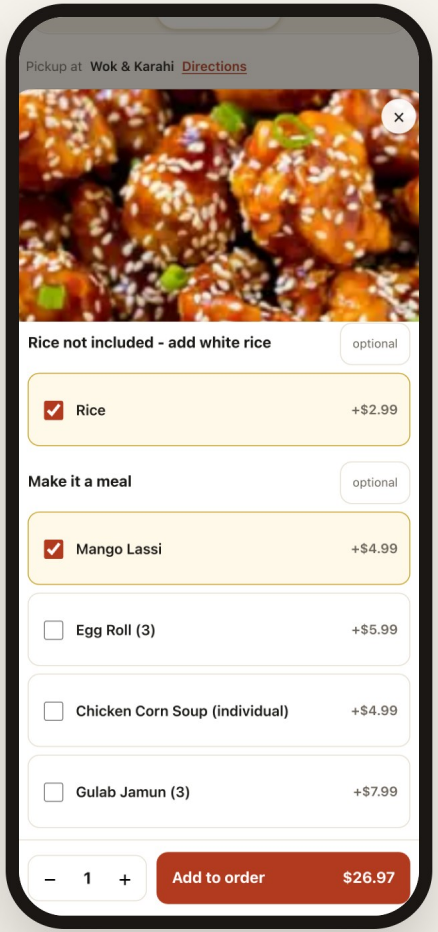

Phone, table, web, catering. Haniya takes the order and the payment, even while we are closed.

English, Spanish, Urdu, Hindi. Regulars by name, their usual, their rewards.

One honest add-on. About 1 in 3 phone guests say yes.

At the table: just ask her

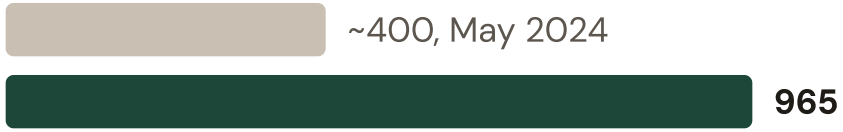

Online: our own ordering

Real screens from our code and menu.

DEPARTMENTS: MARKETING AND FINANCE

Marketing judged on profit. Money that never leaks.

GOOGLE REVIEWS

Search engine that runs itself. Reads search, sales and weather daily; ships what the owner approves.

Found by AI. We show up in ChatGPT, Claude and Gemini answers. Ads and texts judged on real profit.

UNPAID PHONE ORDERS, CHASED AUTOMATICALLY

15 of 19 got paid after the reminder

Paid before it cooks. Every order, every channel. Declined cards rescued in plain words.

One price rule per channel. Fees, chargebacks and leaks watched daily.
